**Official Time** – This is the time from the start of the race to the time that the runner crossed the finish line. All runners in a category will have the same start time – the time when the race is officially started. Runners who start late or are located at the rear end of the starting pack will have greater gun times since the time has already been running for some time when they finally start the race.

**Chip Time** – This is computed from the time that the runner first crossed the start line to the time that the runner has crossed the finish line. This is indicative of true pace as starting late will not affect chip time.

DISCLAIMER: Inaccurate timing may result from the incorrect use or placement of the shoe tag. Incorrect/inaccurate time may have been recorded for the following:

1. Runners who are wearing their bibs and/or RFID shoe tags improperly, or not wearing them at all
2. Runners who participated on behalf of the person registered
3. Runners who did not cross the start/finish line
